The new Silk.

Lets the sound flow naturally.

One of the world's smallest hearing aids, the new Silk™ sits invisibly in the ear for complete discretion. Super soft and super comfortable, it fits immediately without the need for a specially tailored housing. And despite its amazing size, Silk delivers an outstanding hearing experience that's clinically proven to reduce listening effort.

Enjoy life's true sound.

Whether it's an open-plan office, a crowded store or a busy restaurant, wherever there's a high level of ambient noise, holding a conversation requires concentration and effort. Straining to hear voices in these situations is tiring - a fact that even people with normal hearing are familiar with.

Silk tackles these challenges. Its advanced SpeechMaster function continuously monitors what you are listening to. It focuses automatically on your conversation partner while reducing unwanted voices and background noise at the same time. You hear most clearly what you want to hear. As a result, hearing with Silk can be even less straining than normal hearing. All day long. In every situation.

Ask your Hearing Care Professional today what Silk can do for you.

Silk hearing instruments:

Discretion prêt-à-porter.

No waiting – simply walk in, try them on and, once they've been adjusted, take them with you. Unlike normal hearing aids that sit in the ear canal, you don't have to wait for Silk to be custom made. Thanks to their silicone sleeves, your Hearing Care Professional can fit and adjust them to your personal preferences on the spot. And you can step out to the sound of effortless hearing.

The new Silk hearing aids are packed full of advanced features that deliver outstanding sound quality. Its revolutionary binaural OneMic directionality boosts the ear's natural focus on specific sounds from the front while filtering out annoying noises from behind. And thanks to its wireless connectivity, you can stream audio directly to your ears and enjoy the convenience of a wide range of accessories such as remote controls.

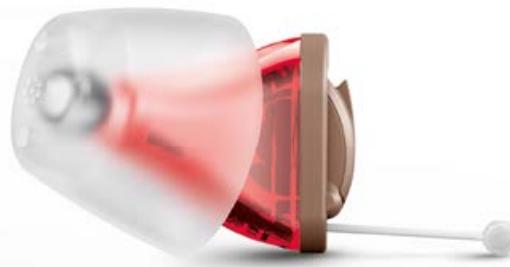

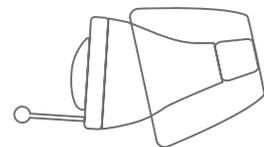

Complete wearing comfort.
Super small and super soft, Click Sleeves are made from flexible silicone to ensure a comfortable fit in every ear. You won't feel them and no one will see them.

Color concept
Blue for the left ear, red for the right. Helps you put them in the correct ear, first time round.

One click and you're done.
Click Sleeves simply click on to Silk hearing aids and sit securely in the ear.

Accessories for Silk hearing instruments:

Tailored to control.

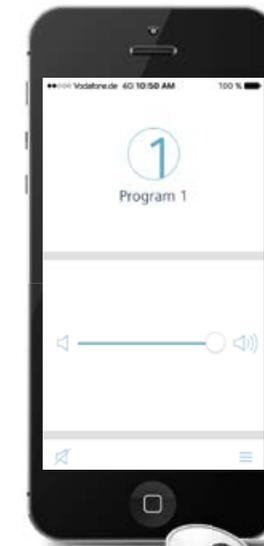

Total discretion, total convenience.

A wide range of wireless accessories give you the ultimate in convenient, discreet control. The touchControl App™* lets you adjust Silk directly from your smartphone.

If you don't want to use a smartphone – no problem! Just hang miniPocket™ on your keyring for discrete and convenient remote control.

For complete convenience, you can control your hearing aids and stream your TV or stereo directly to them with easyTek™ and the easyTek App™*.

Your Hearing Care Professional will be happy to advise you on these accessories and which is best for you.
